

Pastures new - using green roofs on buildings

12 November 2007, London

CPD

Each seminar has a value of
2 hours towards your CPD

Course fees

CIEF/CIRIA Core members/Members of Local Authorities Free

Non members £80+VAT (£94)

Venue

Barclays Global HQ
1 Churchill Place
London E14 5HP

Forthcoming events

Procuring the future - benefiting from sustainable procurement in construction.

24 October 2007, London

Pastures new - using green roofs on buildings

1 November 2007, Manchester

See www.cief.org.uk for full details and for more forthcoming events in the next few months

Training

CIRIA will also be running training on green roofs. For further information please visit:

www.ciria.org

How to book

Complete and fax the form overleaf to CIRIA on

or

call the events team on
+44(0)20 7549 3300

or

register online at
www.ciria.org

Background

Green roofs (and walls) can contribute to sustainable development by providing solutions to stormwater management, climate change mitigation and adaptation, and providing a landscape that reflects local biodiversity and character. Alongside this they can add wider benefits including amenity, quality of life and protection of the building fabric.

Although green roof technology is mainstream in most of Europe, in the UK there is a need to develop further understanding and expertise to make sure that their increasing popularity delivers long term sustainable solutions.

CIRIA's new guidance Building Greener (publication C644) covers the design, construction and maintenance of green roofs, green walls and complementary methods of enhancing biodiversity.

The presentations from guidance authors, steering group members and other key experts will cover biodiversity, stormwater management and thermal performance, looking at case studies to demonstrate practical implementation and dispel myths.

This event will be of interest to clients, planners, contractors and consultants interested in incorporating green roofs on their projects. Delegates will gain:

- ☐ An understanding of the environmental, ecological, social and economic benefits of green roofs and associated features
- ☐ An appreciation of the appropriate technologies and their management to meet varying objectives
- ☐ An understanding of how to overcome typical myths and challenges that surround the implementation of green roofs
- ☐ An overview of benefits from real life experience on case studies

Programme

14:00	Registration and refreshments	15:20	Biodiversity and buildings
14:30	Chairman's Introduction		Dusty Gedge, livingroofs.org
	Jean Venables, Crane Environmental	15:40	Green roofs and climate change - mitigation and adaptation
14:40	Introducing green roofs - enhancing the urban environment		Mark Harris, Sarnafil
	Jamie Dean, Design for London/Andrew Jones, Greater London Authority	16:00	Discussion
15:00	Surface water management - using green roofs	16:40	Close
	Steve Wilson, Sustainable Drainage

or mail it to CIRIA, Classic House, 174–180 Old Street, London EC1V 9BP**

CIEF

The Construction Industry Environmental Forum, aims to improve the sustainability performance of all parties involved in construction. It provides an opportunity to network with members and other experts in a cross-industry forum. Membership currently includes over 200 leading construction organisations and the success of the CIEF has encouraged participation by thousands of individuals.

Benefits of membership

- up-to-date information on key issues and legislation
- opportunity to network with members
- awareness of new technology and management techniques
- free access to an annual programme of events (approx 30 per year)
- a regular CIEF bulletin
- event proceedings.

The CIEF Knowledge Base brings together reports from CIEF workshops held between 1992 and 2001. Comprising 170 notes, the Knowledge Base CD Rom provides an invaluable reference source matters relating to construction and the environment.
