

Coastal flood risk – from storm surge and waves to inundation

FRMRC2 and LANDFORM dissemination workshop

www.floodrisk.org.uk

EPSRC Grant: EP/FP202511/1

Background to FRMRC and LANDFORM

- FRMRC2 will increase understanding of flooding processes, generate new and original science and support improved flood risk management.
- The consortium consists of universities working alongside stakeholders and users in both the public and private sectors.
- The breadth of interests and multi-disciplinary research adds significant value to existing research.
- LANDFORM (Local Authority Network on Drainage and Flood Risk Management) provides a platform for those that work in and with LAs to share information on flood risk management.

Presentations

- Chris Wilson 
- Nicholas Chini 
- Maurice McCabe
- Alistair Borthwick 
- 

Acknowledgements

The research reported in this presentation was conducted as part of the Flood Risk Management Research Consortium with support from the:

- **Engineering and Physical Sciences Research Council**
- **Department of Environment, Food and Rural Affairs/Environment Agency Joint Research Programme**
- **United Kingdom Water Industry Research**
- **Office of Public Works Dublin**
- **Northern Ireland Rivers Agency**

Data were provided by the EA and the Ordnance Survey.

LANDFORM is supported by the Environment Agency
